

Modular-Lab PharmTracer

Cassette-based solution for routine production

Cassette Diversity

The fully automated synthesis system Modular-Lab PharmTracer works with sterile, disposable synthesis cassettes.

The use of sterile, disposable synthesis cassettes ensures the easy handling through click 'n' start technology. Just by changing the cassette the Modular-Lab PharmTracer is ready for the next synthesis run – even if it is a different tracer or nuclide than the one the customer has labeled before. Due to the cassettes' one-time use no reconditioning and cleaning or sanitation routines are necessary.

Cassettes are assembled under GMP-compliant clean room conditions, gamma-sterilized and vacuum-packed (ISO 14644-1). All cassette parts are chemical resistant and were tested for their suitability for the specific syntheses. All materials are free of animal derived ingredients. A shelf life of 18 months can be guaranteed.

Cassettes are available for the following ^{64}Cu , ^{68}Ga , ^{111}In , ^{177}Lu and ^{90}Y applications:
