GMP Suites

A wide range of radiopharmaceutical services under (c)GMP conditions

For more than 25 years, Eckert & Ziegler has been the partner of choice for pharmaceutical companies that develop radiotherapeutics, radiodiagnostics, or radioactive medical devices. Our world-wide network of GMP suites in Europe, Asia, and the Americas will de-risk and speed-up the pre-clinical or clinical development of your radiopharmaceutical.

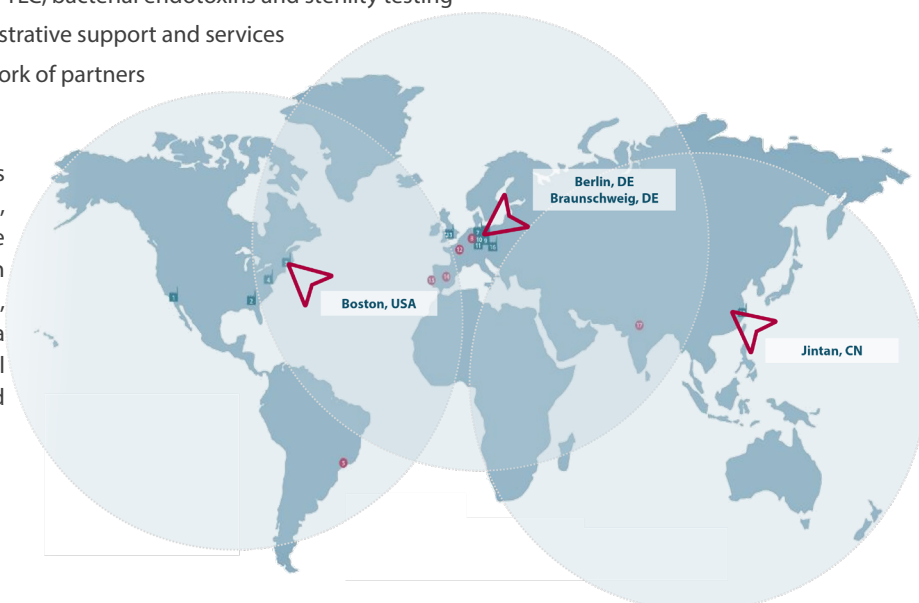

We offer fully licensed radioisotope labs, stable supply arrangements for almost all pharmaceutical radioisotopes, a state-of-the-art infrastructure including logistics, and a highly experienced staff that can be seconded to help with your preclinical and clinical projects. Our customizable clean rooms are equipped with hot cells for alpha, beta, and gamma emitters as well as the radiosynthesis, quality control and further equipment. They are operated in accordance with (c)GMP conditions.

Service Portfolio

- Contract development and contract manufacturing for radiopharmaceuticals and radioactive medical devices
- Service scope from early-stage development to full commercialization
- Flexible use of fully equipped laboratories and skilled personnel on a fee for service basis
- (c)GMP environment to comply with regulatory requirements
- Expertise in handling alpha, beta and gamma emitters such as Ac-225, Lu-177, Ga-68, Zr-89 and many others
- Provision of various radioisotopes (list available upon request)
- State-of-the-art equipment for synthesis and dispensing
- QC including radio-HPLC, radio-TLC, bacterial endotoxins and sterility testing
- Regulatory, logistic and administrative support and services
- Access to comprehensive network of partners

Locations

Whether you are seeking services for the European, North American, Asian, or even the global market, we have you covered. With locations in Germany (Berlin and Braunschweig), the USA (Boston, MA) and China (Jintan), we can meet your global needs for a development and manufacturing partner.

GMP Suites

Capabilities

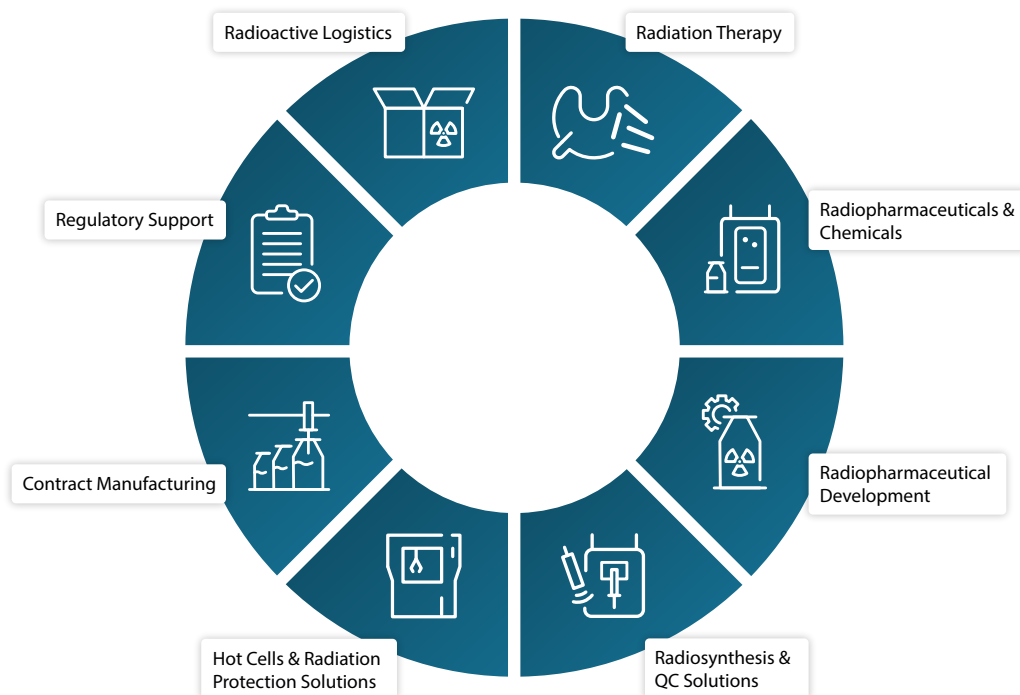

All sites have optimal accessibility to global transportation hubs to facilitate raw material supply chains and product shipment. Our proximity to biotechnology clusters and the scalability of laboratory spaces assures the best possible infrastructure to our customers.

Site	In operation	Clean Room Space / expandable up to		Distance to international airport
Berlin, Germany	since 2023	2.800 sqft 260 m ²		25 Miles / 40 km
Braunschweig, Germany	since 2005	1.970 sqft 183 m ²		40 Miles / 64 km
Boston, USA	since 2022	3.725 sqft 346 m ²	15.000 sqft 1.400 m ²	20 Miles / 32 km
Jintan, China	2025*	2.150 sqft 200 m ²		31 Miles / 50 km

*Initially used for internal projects with forward-looking extension capacities for services

Your One-Stop-Shop at a glance

Eckert and Ziegler provides the full range of products and services for early development and the manufacturing of products for clinical trials and commercial use. We offer process development and scale-up, CMC manufacturing, product release, stability programs, packaging, customizable hot cells and equipment as well as various radioisotopes. Contact our team to learn more.
